Joe,

October rates have come down a bit and November drops further.

Just got off the phone with our power team and no longer need the leverage of the power down. I'd suggest continual mining with only 6 days to go in October.

Thoughts?

Joe,

I can waive the \$10 per unit per month storage fee for Oct and Nov. Let's hope they are not down more than 30 days anyway.

Do I have your approval to power down?

Hey Jeff,

A few follow up questions on powering down:

- If GEM 2/2B power down machines, can they get them powered back on within 2 business days after the power on request?
- Would you be willing to waive the storage fee while you negotiate the lower power rate with Dalton utilities?

Thanks,  
Joe
